LITERARY ALGORITHMS

THE EVOLUTION OF LITERATURE IN THE DIGITAL AGE

National Gallery of Modern Art, Mumbai, Ministry of Culture, Government of India and **Avid Learning** present Literary Algorithms: The Evolution of Literature in the Digital Age. Whether it's the bus ride, the bedside, or any moment in between, our reading journey weaves a captivating tapestry in the digital age. We start our day flipping through the e-pages of news subscriptions and end it by finishing a chapter of the current favorite novel on the tablet.

From Gutenberg's revolutionary printing press to McLuhan's visionary insights into the medium and the message, a continuous thread has shaped the literary landscape. Today we have stepped into the realm of AI-written books, where computational marvels enhance human creativity.

Join us as we cherish literature moving from pages to pixels and beyond and present an immersive discussion with authors, journalists, and tech-forward bibliophiles to understand how the digital metamorphosis of literature will reshape storytelling, publishing, and reading habits.
